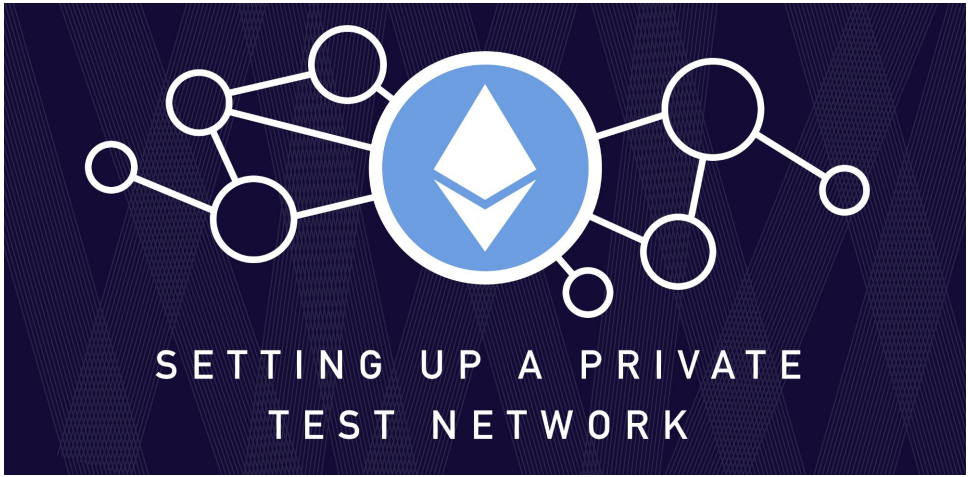
My.Id

Multiple Forms of ID - not Shared
Stored in multiple formats

Many people do not have any verifiable identity

Building Blocks Program UN - 100,000 Blockchain Users

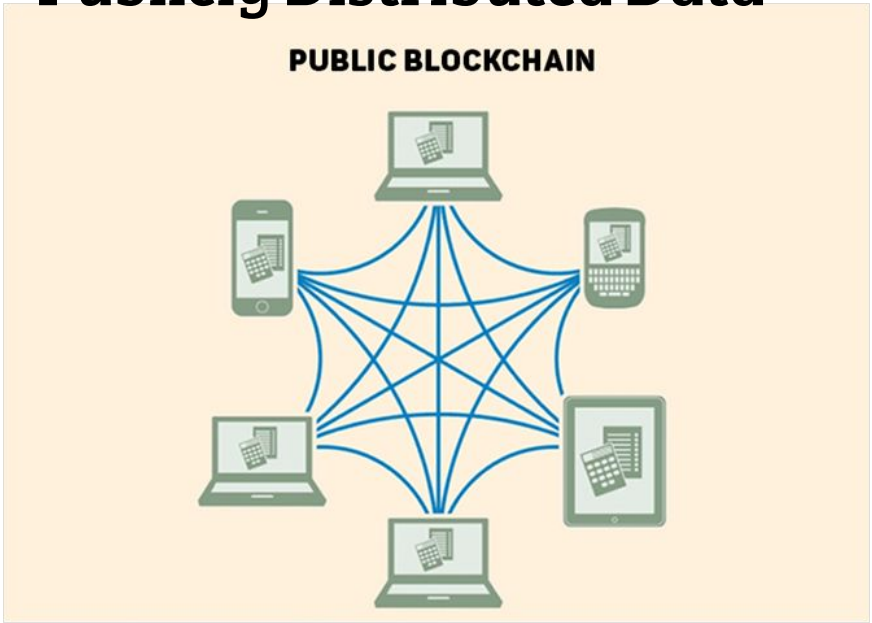


Privately stored -
Data at risk

Private network -
cannot easily
share data

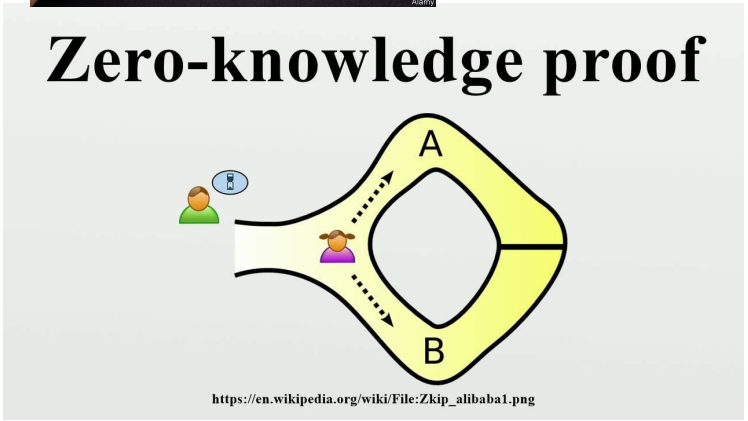
Solution

Publicly Distributed Data

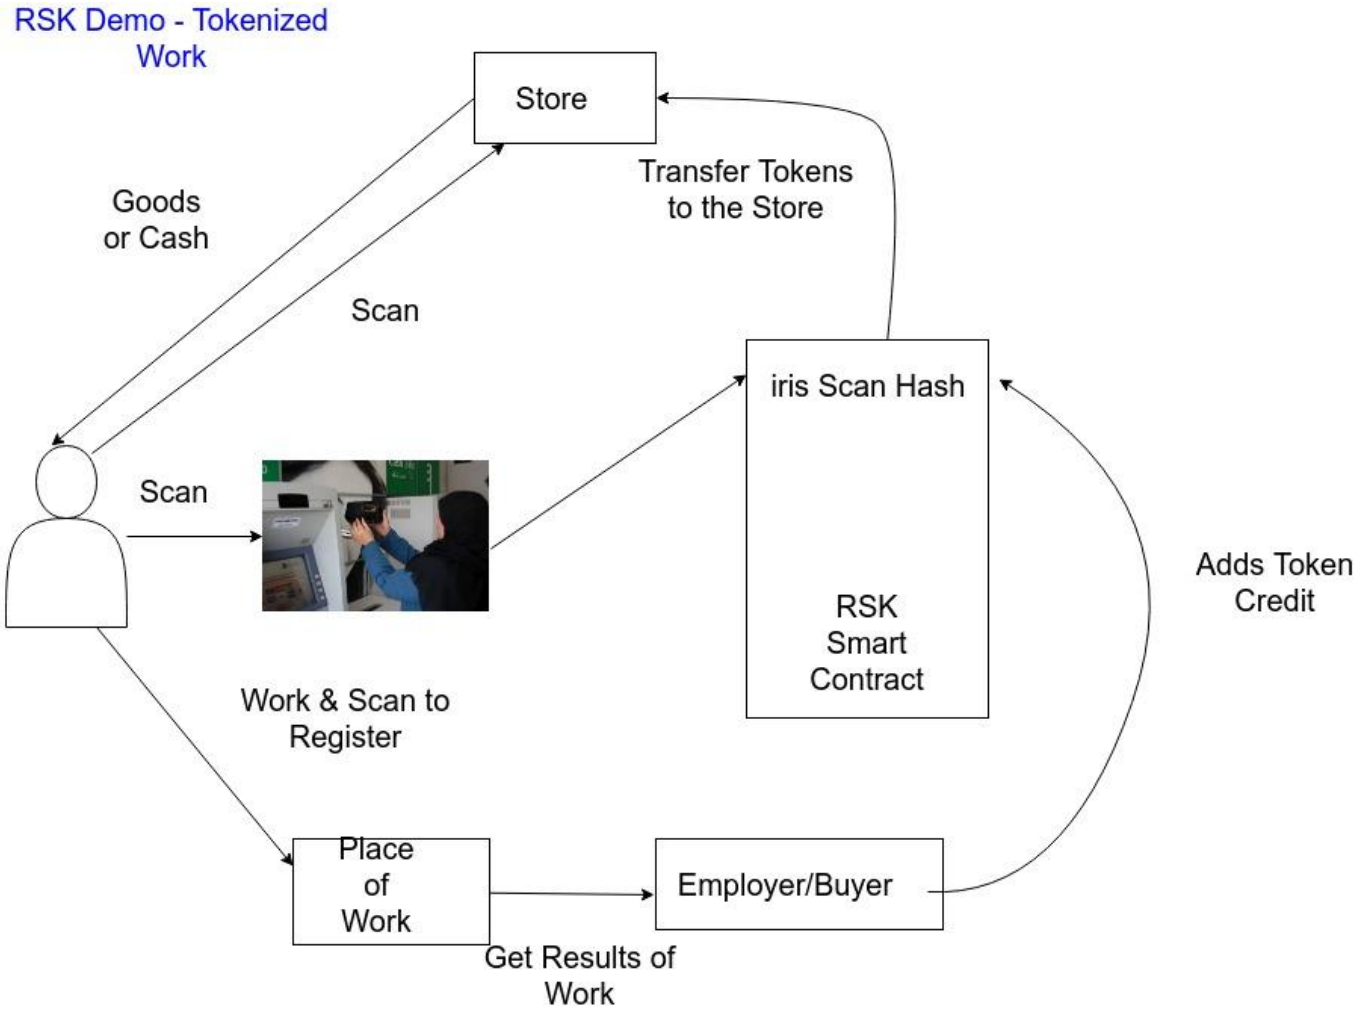


Self sovereignty

Zero-knowledge proof



Do not store IRIS Scan Data



RSK Demo - Tokenized Work
Store
Transfer Tokens to the Store
Goods or Cash
Scan
iris Scan Hash
Scan
RSK Smart Contract
Adds Token Credit
Work & Scan to Register
Place of Work
Employer/Buyer
Get Results of Work

How to Implement Full Solution

Register as a User (at a store)

User performs work (earn tokens on smart contract against id)

User Claims Fiat Money or Goods using Tokens (at a store)

Anti-Fraud

- **GPS**
- **Phone Chip (SGX)**
- **Iris Scan (ZKP)**
- **History (AI)**

Summary

Old	New	Benefit
Private Blockchain	Public Blockchain	Share Data
Store IRIS Related Data	Graduated Security	Not full data stored finally
Limit to Store Cameras	Use mobile	Improve Security
Data owned privately	User controls data	Better security
